Stock count sheet

Location: _____ **Date:** _____

Counted by: _____ **Checked by:** _____

Item	SKU / barcode	Expected	Counted	Difference	Notes

Count everything on one shelf or bin before moving on. Write what you see, not what you expect.
For a blind count, leave Expected empty and fill it in afterwards. Recount any line with a large difference.
Or skip the paper: StockKit runs counts on several phones at once and applies the differences for you, free.
